# **SAFETY DATA SHEET**

## Section 1. Identification

GHS product identifier	: CITGO CompressorGard® PAO 32
Synonyms	: Synthetic lubricant
Code	: 632531001
MSDS #	: 632531001

Relevant identified uses of the substance or mixture and uses advised against Not applicable.

Supplier's details	CITGO Petroleum Corporation P.O. Box 4689 Houston, TX 77210 sdsvend@citgo.com
Emergency telephone number (with hours of operation)	: Technical Contact: (800) 248-4684 Medical Emergency: (832) 486-4700 CHEMTREC Emergency: (800) 424-9300 (United States Only)

## Section 2. Hazards identification

Classification of the substance or mixture       : AQUATIC HAZARD (ACUTE) - Category 2         GHS label elements       AQUATIC HAZARD (LONG-TERM) - Category 1         GHS label elements		
substance or mixture       AQUATIC HAZARD (LONG-TERM) - Category 1         GHS label elements       Hazard pictograms         Hazard pictograms       :         Signal word       :         Hazard statements       :         Toxic to aquatic life.       Very toxic to aquatic life.         Very toxic to aquatic life with long lasting effects.       Precautionary statements         General       :       Keep out of reach of children.         Prevention       :       Avoid release to the environment. Do not get in eyes, on skin, or on clothing.         Response       :       Collect spillage. Wash with plenty of soap and water or use a recognized skin or in a dry place and a closed container. Empty containers may contain material in which can ignite with explosive force. Misuse of empty containers can be dang used to store toxic, flammable, or reactive materials. Cutting or welding of empty containers can be dang used to store toxic, flammable, or reactine materials. Cutting or welding of empty containers can be dang used to store toxic, flammable, or reactioners, so th eat. Keep co closed and drum bungs in place. All label warnings and precautions must be on Return empty drums to a qualified reconditionier. Consult appropriate federal, so local authorities before reusing, reconditioning, recycling, or disposit empty containers and/or waste residues of this material.         Disposal       :       Dispose of contents and container in accordance with all local, regional, national international regulations.         Hazards not otherwise classified       :		is material is considered hazardous by the OSHA Hazard Communication Standard 9 CFR 1910.1200).
Hazard pictograms       :         Signal word       :       Warning         Hazard statements       :       Toxic to aquatic life. Very toxic to aquatic life with long lasting effects.         Precautionary statements       :       Keep out of reach of children.         Prevention       :       Avoid release to the environment. Do not get in eyes, on skin, or on clothing.         Response       :       Collect spillage. Wash with plenty of soap and water or use a recognized skin of in a dry place and a closed container. Empty containers may contain material r which can ignite with explosive force. Misuse of empty containers can be dang used to store toxic, flammable, or reactive materials. Cutting or welding of emp containers can cause fire, explosion, or release of toxic fumes from residues. D pressurize or expose empty containers to open flame, sparks, or heat. Keep cc closed and drum bungs in place. All label warnings and precautions must be ol Return empty drums to a qualified reconditionir, reclaiming, recycling, or disposit empty containers and/or waste residues of this material.         Disposal       :       Dispose of contents and container in accordance with all local, regional, nationa international regulations.         Hazards not otherwise classified       :       Injection of pressurized hydrocarbons can cause severe permanent tissue dam Initial symptoms may be minor.		
Signal word       : Warning         Hazard statements       : Toxic to aquatic life. Very toxic to aquatic life with long lasting effects.         Precautionary statements       : Keep out of reach of children.         General       : Keep out of reach of children.         Prevention       : Avoid release to the environment. Do not get in eyes, on skin, or on clothing.         Response       : Collect spillage. Wash with plenty of soap and water or use a recognized skin or in a dry place and a closed container. Empty containers may contain material r which can ignite with explosive force. Misuse of empty containers can be dang used to store toxic, flammable, or reactive materials. Cutting or welding of empt containers can cause fire, explosion, or release of toxic fumes from residues. I pressurize or expose empty containers to open flame, sparks, or heat. Keep co closed and drum bungs in place. All label warnings and precautions must be of Return empty drums to a qualified reconditioner. Consult appropriate federal, s local authorities before reusing, reconditioning, reclaiming, recycling, or disposite empty containers and/or waste residues of this material.         Disposal       : Dispose of contents and container in accordance with all local, regional, nationat international regulations.         Hazards not otherwise classified       : Injection of pressurized hydrocarbons can cause severe permanent tissue dam Initial symptoms may be minor. Injection of petroleum hydrocarbons requires immediate medical attention.	el elements	
Hazard statements: Toxic to aquatic life. Very toxic to aquatic life with long lasting effects.Precautionary statementsGeneral: Keep out of reach of children.Prevention: Avoid release to the environment. Do not get in eyes, on skin, or on clothing.Response: Collect spillage. Wash with plenty of soap and water or use a recognized skin or storageStorage: Store in accordance with all local, regional, national and international regulation in a dry place and a closed container. Empty containers may contain material r which can ignite with explosive force. Misuse of empty containers can be dang used to store toxic, flammable, or reactive materials. Cutting or welding of emp containers can cause fire, explosion, or release of toxic fumes from residues. D pressurize or expose empty containers to open flame, sparks, or heat. Keep co closed and drum bungs in place. All label warnings and precautions must be of Return empty drums to a qualified reconditioner. Consult appropriate federal, s local authorities before reusing, reconditioning, reclaiming, recycling, or disposite empty containers and/or waste residues of this material.Disposal: Dispose of contents and container in accordance with all local, regional, national international regulations.Hazards not otherwise classified: Injection of pressurized hydrocarbons can cause severe permanent tissue dam initial symptoms may be minor. Injection of petroleum hydrocarbons requires immediate medical attention.	pictograms :	¥2

## Section 3. Composition/information on ingredients

#### Substance/mixture Other means of identification

: Mixture

: Synthetic lubricant

#### **CAS number/other identifiers**

**CAS** number

: Not applicable.

Ingredient name	%	CAS number
1-Dodecene, homopolymer, hydrogenated	≥25 - ≤39	151006-63-2
1-Dodecene, Trimer, Hydrogenated	≥25 - ≤50	151006-62-1
1-Decene, tetramer, mixed with 1-decene trimer, hydrogenated	≥10 - ≤25	68649-12-7
1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated	≥10 - ≤25	163149-28-8
1-Dodecene, polymer with 1-decene, hydrogenated	≥10 - ≤25	151006-60-9
triphenyl phosphate	≤0.3	115-86-6

\* = Various \*\* = Mixture \*\*\* = Proprietary

Any concentration shown as a range is to protect confidentiality or is due to process variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

#### Description of necessary first aid measures

Eye contact	<ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.</li> </ul>
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
Skin contact	<ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.</li> </ul>
Ingestion	: Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

#### Most important symptoms/effects, acute and delayed

Potential acute health	<u>n effects</u>	
Eye contact	: No known significant effects or critical hazards.	
Inhalation	: No known significant effects or critical hazards.	
Skin contact	<ul> <li>Injection of pressurized hydrocarbons can cause severe permanent tissue damage. Initial symptoms may be minor.</li> </ul>	
Ingestion	: No known significant effects or critical hazards.	
Over-exposure signs/symptoms		
Eye contact	: No specific data.	
Inhalation	: No specific data.	
Skin contact	: No specific data.	
Ingestion	: No specific data.	

#### Indication of immediate medical attention and special treatment needed, if necessary

## Section 4. First aid measures

Notes to physician	: In the event of injection in underlying tissue, immediate treatment should include extensive incision, debridement and saline irrigation. Inadequate treatment can result in ischemia and gangrene. Early symptoms may be minimal.
Specific treatments	: Treat symptomatically and supportively.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire-fighting measures		
Extinguishing media		
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.	
Unsuitable extinguishing media	: None known.	
Specific hazards arising from the chemical	: In a fire or if heated, a pressure increase will occur and the container may burst. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.	
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide phosphorus oxides	
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.	
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.	

## Section 6. Accidental release measures

Personal precautions, protec	<u>tiv</u>	e equipment and emergency procedures
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.
For emergency responders	:	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.
Methods and materials for co	<u>nt</u>	ainment and cleaning up
Small snill		Stop leak if without risk. Move containers from spill area. Dilute with water and mon up

Small spill
 Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

## Section 6. Accidental release measures

Large spill	: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see
	Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

Precautions for safe handling	
Protective measures	Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Avoid release to the environment. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.
	Bulk Storage Conditions: Maintain all storage tanks in accordance with applicable regulations. Use necessary controls to monitor tank inventories. Inspect all storage tanks on a periodic basis. Test tanks and associated piping for tightness. Maintain the automatic leak detection devices to assure proper working condition.

## Section 8. Exposure controls/personal protection

#### Control parameters

#### **Occupational exposure limits**

1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated

1-Dodecene, polymer with 1-decene, hydrogenated

triphenyl phosphate

#### ACGIH TLV (United States). Inhalable Fraction: 5 mg/m<sup>3</sup> Form: Aerosol. ACGIH TLV (United States).

ACGIH TLV (United States). Inhalable Fraction: 5 mg/m<sup>3</sup> Form: Aerosol. ACGIH TLV (United States, 1/2023). TWA: 3 mg/m<sup>3</sup> 8 hours. NIOSH REL (United States, 10/2020). TWA: 3 mg/m<sup>3</sup> 10 hours. OSHA PEL (United States, 5/2018). TWA: 3 mg/m<sup>3</sup> 8 hours.

Appropriate engineering controls	: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Environmental exposure controls	: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, vapor controls, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

#### Individual protection measures

Date	of	issue/Dat	e of	revision	

## Section 8. Exposure controls/personal protection

•		· · ·
Hygiene measures	:	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	:	Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles. Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If inhalation hazards exist, a full-face respirator may be required instead.
Skin protection		
Hand protection	:	Avoid skin contact with liquid. Chemical-resistant gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. Leather gloves are not protective for liquid contact.
Body protection	:	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	:	Avoid skin contact with liquid. Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Leather boots are not protective for liquid contact.
Respiratory protection	:	Avoid inhalation of gases, vapors, mists or dusts. Use a properly fitted, air-purifying or supplied-air respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

## Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

<u>Appearance</u>	
Physical state	: Liquid.
Color	: Light amber
Odor	: Mild.
рН	: Not available.
Boiling point, initial boiling point, and boiling range	: Not available.
Flash point	: Open cup: 266°C (510.8°F) [Cleveland]
Evaporation rate	: <1 (butyl acetate = 1)
Lower and upper explosive (flammable) limits	: Not available.
Vapor pressure	: <0.013 kPa (<0.1 mm Hg)
Relative vapor density	: >1 [Air = 1]
Relative density	: 0.84
Density Ibs/gal	: Estimated 7 lbs/gal
Density gm/cm <sup>3</sup>	: Not available.
Gravity, °API	: Estimated 37 @ 60 F
Solubility	: Insoluble in the following materials: cold water.
Auto-ignition temperature	: Lowest known value: 343 to 369°C (649.4 to 696.2°F) (Dec-1-ene, homopolymer, hydrogenated).

Viscosity	: Kinematic (40°C (104°F)): 32 mm²/s (32 cSt)
Viscosity SUS	: Estimated 148 SUS @104 F
Flow time (ISO 2431)	: Not available.
Particle characteristics	
Median particle size	: Not applicable.

## Section 10. Stability and reactivity

Reactivity	: Not expected to be Explosive, Self-Reactive, Self-Heating, or an Organic Peroxide under US GHS Definition(s).
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: No specific data.
Incompatible materials	: No specific data.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## Section 11. Toxicological information

## Information on toxicological effects

Acute	toxicity
	tertienty

Product/ingredient name	Result	Species	Dose	Exposure
1-Dodecene, homopolymer, hydrogenated	LD50 Dermal	Rabbit	>2000 mg/kg	-
<i>,</i>	LD50 Oral	Rat	>2000 mg/kg	-
1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated	LC50 Inhalation Dusts and mists	Rat - Male, Female	1.17 mg/l	4 hours
	LD50 Dermal	Rat - Male, Female	>2000 mg/kg	-
	LD50 Oral	Rat - Male, Female	>5000 mg/kg	-
1-Dodecene, polymer with 1-decene, hydrogenated	LC50 Inhalation Dusts and mists	Rat - Male, Female	>5 mg/l	4 hours
	LD50 Dermal	Rat - Male, Female	>2000 mg/kg	-
	LD50 Oral	Rat - Male, Female	>5000 mg/kg	-
triphenyl phosphate	LD50 Dermal LD50 Oral	Rabbit Rat	>7900 mg/kg 3500 mg/kg	-

non-irritating to the skin.

**1-Dodecene, homopolymer, hydrogenated**: Practically non-irritating to eyes. Practically non-irritating to the skin.

**bis(tridecyl) adipate**: Practically non-irritating to eyes and to the skin. Practically non-toxic by inhalation ( $LC_{50} > 5mg/L$ ) in rats.

#### Irritation/Corrosion

## Section 11. Toxicological information

Product/ingredient name	Result	Species	Score	Exposure	Observation
1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated	Eyes - Redness of the conjunctivae	Rabbit	1	24 hours 0.5 ml	72 hours
	Skin - Edema	Rabbit	0.7	4 hours 0.5ml	7 days
1-Dodecene, polymer with 1-decene, hydrogenated	Eyes - Redness of the conjunctivae	Rabbit	1	24 hours 0.5 ml	72 hours
	Skin - Edema	Rabbit	0.7	4 hours 0.5ml	7 days
Skin	: 1-Dodecene, polymer v cause mild skin irritation 1-Dodecene, polymer v skin irritation and inflam	and inflammati vith 1-decene,	ion.		•
Eyes	<ul> <li>1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated: Practically non- irritating to eyes.</li> <li>1-Dodecene, polymer with 1-decene, hydrogenated: Practically non-irritating to eyes.</li> </ul>				
Respiratory	: No additional information	٦.			

## Sensitization

Product/ingredient name	Route of exposure	Species	Result
1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated	skin	Guinea pig	Not sensitizing
1-Dodecene, polymer with 1-decene, hydrogenated	skin	Guinea pig	Not sensitizing

Skin

: 1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated: Non-sensitizer to skin.

1-Dodecene, polymer with 1-decene, hydrogenated: Non-sensitizer to skin.No additional information.

#### Respiratory Mutagenicity

Product/ingredient name	Test	Experiment	Result
1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated	EU	Experiment: In vitro Subject: Bacteria	Negative
	EU	Experiment: In vivo Subject: Mammalian-Animal	Negative
1-Dodecene, polymer with 1-decene, hydrogenated	EU	Experiment: In vitro Subject: Bacteria	Negative
, <b>,</b>	EU	Experiment: In vivo Subject: Mammalian-Animal	Negative

: 1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated: No mutager effect.

1-Dodecene, polymer with 1-decene, hydrogenated: No mutagenic effect.

### **Carcinogenicity**

Not available.

Reproductive toxicity

Product/ingredient name	Maternal toxicity	Fertility	Development toxin	Species	Dose	Exposure
1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated	Negative	Negative	Negative	Rat - Male, Female	Oral: 1000 mg/ kg	-
1-Dodecene, polymer with 1-decene, hydrogenated	Negative	Negative	Negative	Rat - Male, Female	Oral: 1000 mg/ kg	-

## Section 11. Toxicological information

	ological information				
Conclusion/Summary	<ul> <li>1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated: No known significant effects or critical hazards.</li> <li>1-Dodecene, polymer with 1-decene, hydrogenated: No known significant effects or critical hazards.</li> </ul>				
<u>Teratogenicity</u> Not available.					
Conclusion/Summary	: No additional information.				
Specific target organ toxici Not available.	<u>ty (single exposure)</u>				
Specific target organ toxici Not available.	<u>ty (repeated exposure)</u>				
Aspiration hazard					
Name		Result			
	vith 1-decene trimer, hydrogenated -decene and 1-octene, hydrogenated -decene, hydrogenated	ASPIRATION HAZARD - Category 1 ASPIRATION HAZARD - Category 1 ASPIRATION HAZARD - Category 1			
Information on the likely routes of exposure	: Routes of entry anticipated: Dermal.				
Potential acute health effect	<u>s</u>				
Eye contact	: No known significant effects or critica				
Inhalation	: No known significant effects or critica				
Skin contact	<ul> <li>Injection of pressurized hydrocarbons can cause severe permanent tissue damage. Initial symptoms may be minor.</li> </ul>				
Ingestion	: No known significant effects or critical hazards.				
Symptoms related to the phy	vsical, chemical and toxicological chara	acteristics			
Eye contact	: No specific data.				
Inhalation	: No specific data.				
Skin contact	: No specific data.	No specific data.			
Ingestion	: No specific data.				
Delayed and immediate effe	cts and also chronic effects from short	and long term exposure			
<u>Short term exposure</u> Potential immediate effects	: Not available.				
Potential delayed effects	: Not available.				
Long term exposure					
Potential immediate effects	: Not available.				
Potential delayed effects	Not available.				
Potential chronic health eff	ects				
Not available.					
General	: No known significant effects or critica	l hazards.			
Carcinogenicity	: No known significant effects or critica				
Mutagenicity	: No known significant effects or critica				
Teratogenicity	: No known significant effects or critica				
Developmental effects	: No known significant effects or critica				
Fertility effects	: No known significant effects or critica

## Section 12. Ecological information

Product/ingredient name	Result	Species	Exposure
1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated	Acute EC50 1000 mg/l Fresh water	Crustaceans - Daphnia magna	48 hours
	Acute LC50 >1000 mg/l Fresh water	Fish - Oncorhynchus mykiss - Juvenile (Fledgling, Hatchling, Weanling)	96 hours
	Chronic NOEL 125 mg/l Fresh water	Crustaceans - Daphnia magna	21 days
1-Dodecene, polymer with 1-decene, hydrogenated	Acute EC50 1000 mg/l Fresh water	Crustaceans - Daphnia magna	48 hours
	Acute LC50 >1000 mg/l Fresh water	Fish - Oncorhynchus mykiss - Juvenile (Fledgling, Hatchling, Weanling)	96 hours
	Chronic NOEL 125 mg/l Fresh water	Crustaceans - Daphnia magna	21 days
triphenyl phosphate	Acute EC50 225 µg/l Fresh water	Fish - Oncorhynchus mykiss - Fingerling	96 hours
	Acute LC50 320 to 560 µg/l Marine water	Crustaceans - Americamysis bahia	48 hours
	Acute LC50 0.09 mg/l Fresh water	Daphnia - Daphnia magna - Neonate	48 hours
	Chronic NOEC 0.01 mg/l	Algae - Chlorella vulgaris	3 days
	Chronic NOEC 50 µg/l Fresh water	Daphnia - Daphnia magna - Neonate	21 days
	Chronic NOEC 131 ng/L Fresh water	Fish - Oryzias latipes - Larvae	103 days

**1-Dodecene, polymer with 1-decene, hydrogenated**: No known significant effects or critical hazards.

Persistence and degradat	<u>pility</u>
Not available.	
<b>Conclusion/Summary</b>	: Not available.

**Bioaccumulative potential** 

## Section 12. Ecological information

Product/ingredient name	LogPow	BCF	Potential
1-Dodecene, homopolymer, hydrogenated	>6.5	-	high
1-Decene, tetramer, mixed with 1-decene trimer, hydrogenated	5	-	high
1-Dodecene, polymer with 1-decene and 1-octene, hydrogenated	>6.5	-	high
1-Dodecene, polymer with 1-decene, hydrogenated	>6.5	-	high
triphenyl phosphate	4.63	144	low

#### **Mobility in soil**

Soil/water partition	: Not available.
coefficient (Koc)	

Other adverse effects : No known significant effects or critical hazards.

## Section 13. Disposal considerations

Disposal methods	: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
------------------	--

## Section 14. Transport information

	DOT Classification	IMDG	IATA
UN number	Not regulated.	Not regulated.	Not regulated.
UN proper shipping name	-	-	-
Transport hazard class(es)	-	-	-
Packing group	-	-	-
Environmental hazards	No.	No.	No.

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : N	
to IMO instruments	

## Section 14. Transport information

## Section 15. Regulatory information

```
U.S. Federal regulations : United States inventory (TSCA 8b): All components are listed or exempted.
Clean Water Act (CWA) 311: propylene oxide
```

This material is classified as an oil under Section 311 of the Clean Water Act (CWA) and the Oil Pollution Act of 1990 (OPA). Discharges or spills which produce a visible sheen on waters of the United States, their adjoining shorelines, or into conduits leading to surface waters must be reported to the EPA's National Response Center at (800) 424-8802.
